

# CoinATMmap Registration and Integration

1. Before registering and publishing your ATM data to third parties, you must enable Publishing to GENERAL BYTES HQ in CAS - Terminal Templates - Publish Settings. Because of the decentralized design of CAS, the default setting is 'disabled.'

### Publish Settings

Enable "Publish to HQ" and information about your Terminal will be published to [coinatmradar.com](https://coinatmradar.com). Is your Terminal displayed on their website? It helps your customers to find your ATM.

<input checked="" type="checkbox"/> Publish To HQ (GENERAL BYTES)	<input checked="" type="checkbox"/> Show Terminal Location
<input checked="" type="checkbox"/> Show Terminal Prices	<input checked="" type="checkbox"/> Show Terminal Fees
<input checked="" type="checkbox"/> Show Terminal Limits	<input checked="" type="checkbox"/> Show AML Type
<input checked="" type="checkbox"/> Report Buy Available	
<input type="checkbox"/> Report Cash Boxes Contains Of IN Type	

Operator Public Name

Your Operator Brand Name here

Operator Website

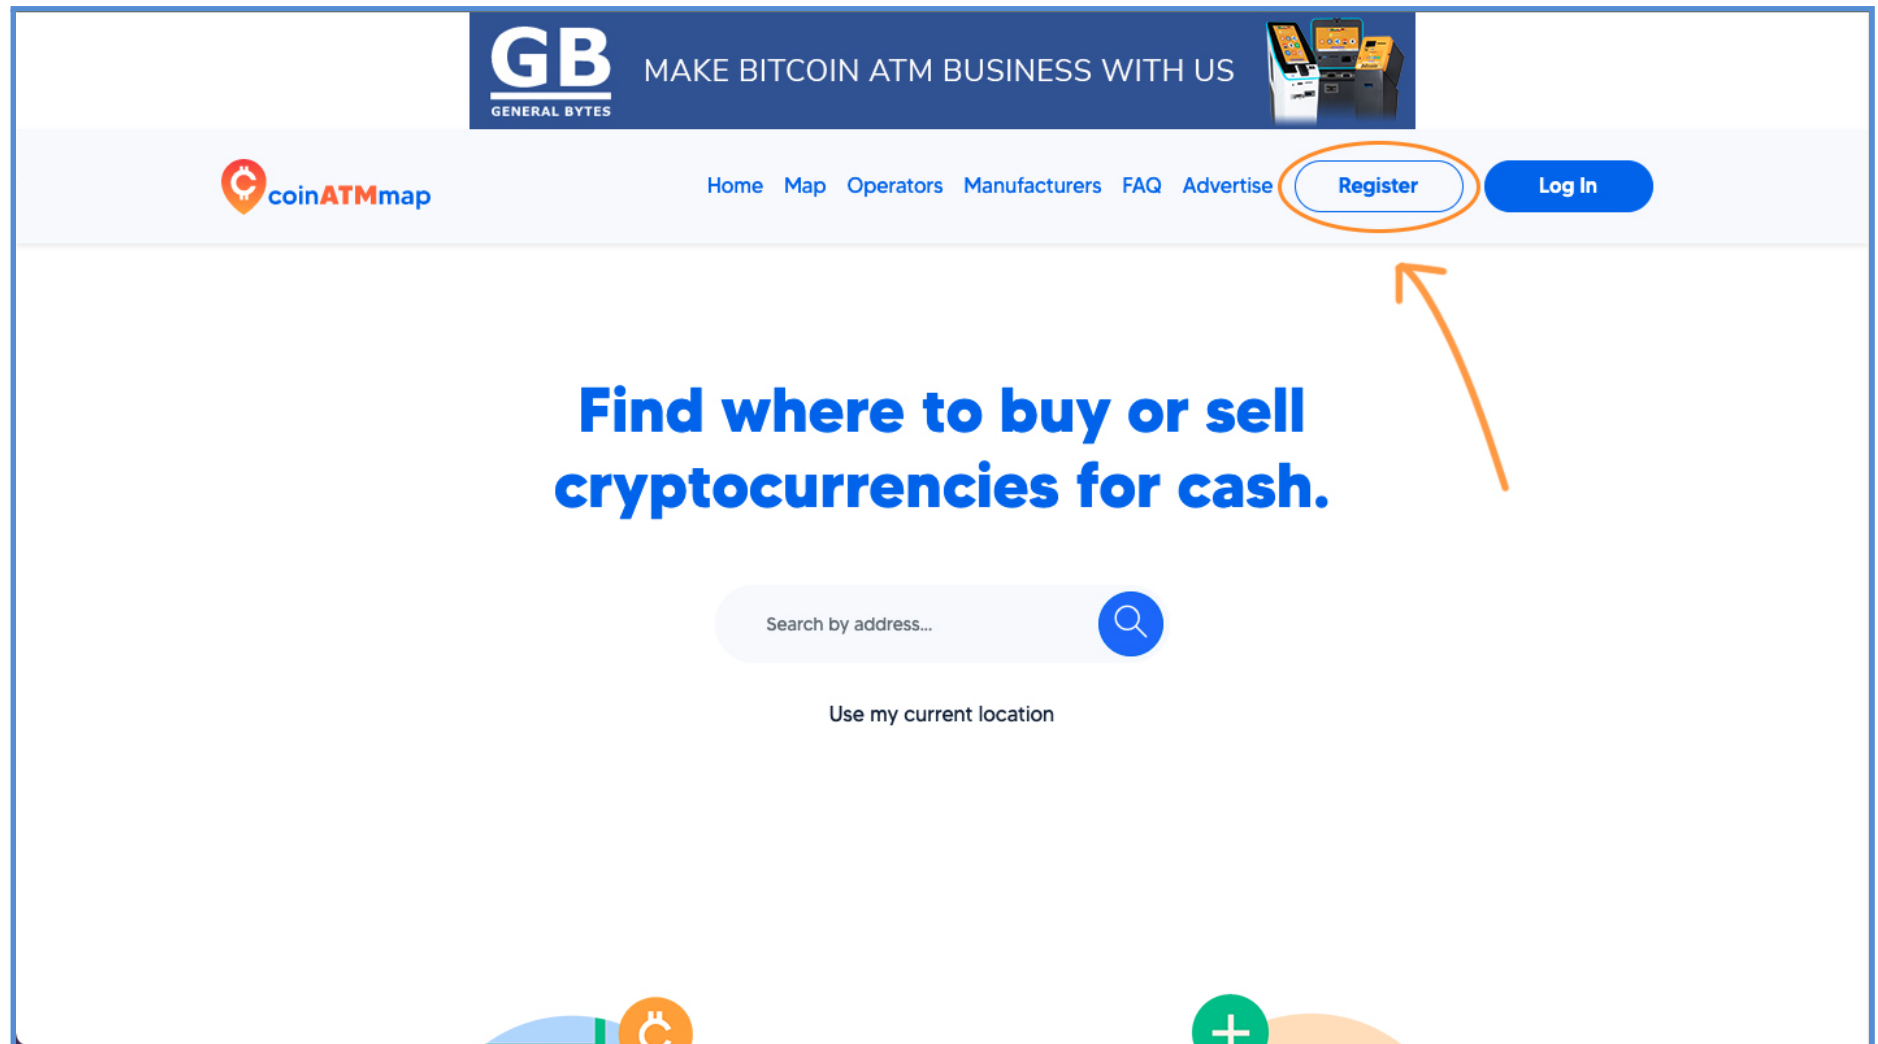

<https://your.website.here/>

In addition to defining data publishing to third parties in the 'Terminal Templates' section, you will need to specify a descriptive name for each of your ATMs in CAS - Terminals - Terminal# - Publish Settings, as displayed in the sample below.

### Publish Settings

Terminal Public Name	ATM At 7-Eleven on Westheimer.	Terminal Comment	ATM is located next to the frozen foods section.
----------------------	--------------------------------	------------------	--

2. Visit: [coinatmmap.com](https://coinatmmap.com) and **create a CoinATMmap Operator account** by clicking the “Register” button. If you already have an account at CoinATMmap, you can skip this and continue with point 6.

3. **Fill out your operator information and click submit.** Once your application is approved, you will be able to log in to your CoinATMmap operator dashboard. If you have any issues while registering, please contact [info@coinatmmap.com](mailto:info@coinatmmap.com).

### Apply to register as an operator in order to submit your location(s).

6. Connecting to the GB API will allow you to instantly sync your locations with just the click of a button.

**IMPORTANT:** Please email [info@coinatmmmap.com](mailto:info@coinatmmmap.com) to connect your account to the General Bytes API. Include Your Operator Name as it appears on your General Bytes CAS profile.

The screenshot shows the coinATMmap web interface. On the left is a dark sidebar with navigation links: Analytics, ATMs (selected), Active, Closed, Profile, and Help. The main content area is titled 'Active ATMs' and contains a search bar, filters for Country, State, and Sync Status, and a 'Synchronize' button circled in orange with an arrow pointing to it. Below these are 'Add', 'Import', and 'Export' buttons. A table lists 10 Bitcoin ATMs with columns for ATM ID, Location Name, Address, Supported (Bitcoin icon), Sync (Enabled), Added, Modified, and Actions (edit/delete icons). The footer shows '© 2022. All rights reserved.' and 'Powered by CoreUI'.
